Leaving Space for Nature Nigel Dudley 2020-04-29 This book provides the first contemporary assessment of area-based conservation and its implications for nature and society. Now covering 15 per cent of the land surface and a growing area of ocean, the creation of protected areas is one of the fastest conscious changes in land management in history. But this has come at a cost, including a backlash from human rights organisations about the social impacts of protected areas. At the same time, a range of new types of area-based conservation has emerged, based on indigenous people's territories, local community lands and a new designation of "other effective area-based conservation measures". This book provides a concise overview of the status and possible futures of area-based conservation. With many people calling for half the earth's land surface to remain in a natural condition, this book taps into the urgent debate about the feasibility of such an aim and the ways in which such land might be managed. It provides a timely contribution by people who have been at the centre of the debate for the last twenty years. Building on the authors' large personal knowledge, the book draws on global case studies where the authors have firsthand experience, including Yosemite National Park (USA), Blue Mountains National Park (Australia), Bwindi National Park (Uganda), Chingaza National Park (Colombia), Ustyart Plateau (Kazakhstan), Snowdonia National Park (Wales) and many more. This book is essential reading for students, academics and practitioners interested in conservation and its impact on society.

Where Are the Customers' Yachts Fred Schwed, Jr. 2006-01-10 "Once I picked it up I did not put it down until I finished. . . . What Schwed has done is capture fully-in deceptively clean language-the lunacy at the heart of the investment business." -- From the Foreword by Michael Lewis, Bestselling author of *Liar's Poker* ". . . one of the funniest books ever written about Wall Street." -- Jane Bryant Quinn, *The Washington Post* "How great to have a reissue of a hilarious classic that proves the more things change the more they stay the same. Only the names have been changed to protect the innocent." -- Michael Bloomberg "It's amazing how well Schwed's book is holding up after fifty-five years. About the only thing that's changed on Wall Street is that

computers have replaced pencils and graph paper. Otherwise, the basics are the same. The investor's need to believe somebody is matched by the financial advisor's need to make a nice living. If one of them has to be disappointed, it's bound to be the former." -- John Rothchild, Author, *A Fool and His Money*, Financial Columnist, Time magazine Humorous and entertaining, this book exposes the folly and hypocrisy of Wall Street. The title refers to a story about a visitor to New York who admired the yachts of the bankers and brokers. Naively, he asked where all the customers' yachts were? Of course, none of the customers could afford yachts, even though they dutifully followed the advice of their bankers and brokers. Full of wise contrarian advice and offering a true look at the world of investing, in which brokers get rich while their customers go broke, this book continues to open the eyes of investors to the reality of Wall Street.

Herbicide Resistance in Plants Hugh J Beckie 2020-09-04 Today, herbicide-resistant weeds dominate research and development efforts in the discipline of weed science. The incidence, management challenges, and cost of multiple herbicide-resistant weed populations are continually increasing worldwide. Crop varieties with multiple herbicide-resistance traits are being rapidly adopted by growers and land managers to keep ahead of the weed resistance tsunami. This Special Issue of Plants comprises papers that describe the current status and future outlook of herbicide resistance research and development in weedy and domestic plants, with topics covering the full spectrum from resistance mechanisms to resistance management. The unifying framework for this Special issue is the challenge posed to all of the contributing authors: What are the (potential) implications for herbicide resistance management?
